# CLOSE PERSONAL PROTECTION

Close Protection is at the heart of what we do. All other business areas support our Practitioners to ensure every security detail is successful, allowing our Principals to Live Their Best Lives.

Close Personal Protection operations protect individuals found at higher Risks due to their position within an organization, their activities, or geographical location - or during periods of higher threat levels requiring additional security.

Close Personal Protection Practitioners are most proximate to the protected Principal. These individuals are responsible for their assignment's overall daily safety, security, and logistical coordination needs.

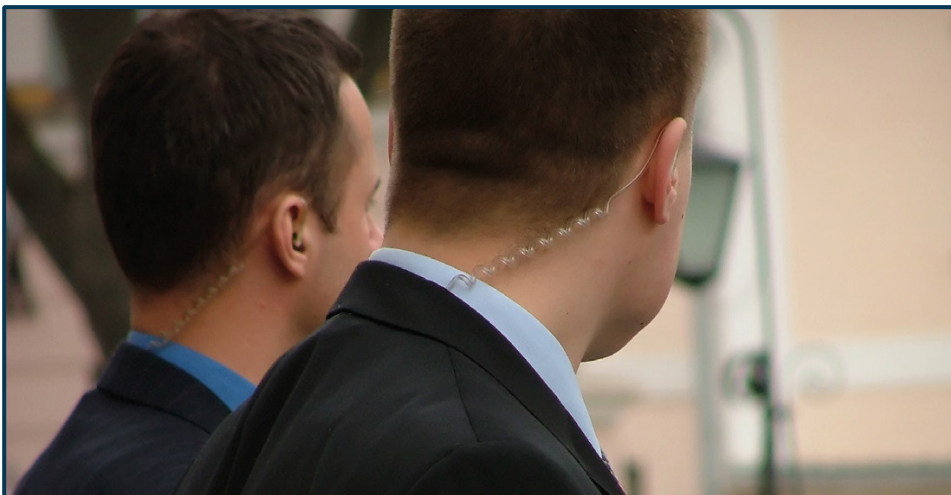

Personal Protection Practitioners are part of the "inner circle" of the Principal. They are more intimately involved with and knowledgeable of the Principal's schedules, business, and personal.
